---

**893** people have attended literacy events or activities

**2136** people have attended scheduled classes or events

**1013** requests for information have been completed

**1077** referrals to community agencies have been made

# Impact on Health Literacy

Quoted from a letter sent by an FLC visitor

---

"The Family Learning Center had been so helpful and knowledgeable in helping me to understand my daughter's new disease as I was given resources that could help me. Usually doctor's appointments are so nerve racking, but having the center helped not only me to understand and therefore make informed decisions regarding my daughter's health care but also kept my daughter occupied and happy having computers and books in a quiet, friendly atmosphere."
